

Ampule Filling / Sealing Machine (NF-3 type)

This is small machine that operates filling, Sealing and replacement of Nitrogen automatically. As it adopts before and after replacement, it can produce the reliable pharmaceutical. SUS316 is used. It also uses Glass / Silicon Tube. Because it is light weighted and small size, it can be operated in Clean Bench, and recommended most for the use at hospital and research center.

SPECS

Targeted Ampule : 1mL ~ 20mL

Capacity : more than 400bottles / hr

Replacement of Nitrogen Gas : Before and after replacement

Sealing Gas : City gas or LPG + enzyme

Compressed Air : 0.2Mpa

Power Supply : AC100V 25W

Machine Size : W400 x D590 x H490mm

Weight : Approx. 26kg
